

CALL FOR PAPERS

The Sixth Conference on Software Engineering and Information Management (SEIM-2021) opens its doors to young researchers and practitioners in various areas of computer science and software engineering, providing an opportunity to present their research, discuss state-of-the-art technology and engage in professional networking. As before, we consider SEIM to mainly focus on researchers who are just starting out their scientific careers, and hope to ease their introduction to the conference process. On the other hand, SEIM might also be of interest to more experienced researchers, who are aimed at sharing their research with a wider scientific community, as the selected papers will be published on CEUR-ws.org.

🏆 **Best paper award**

Important Dates

15 February

paper submission deadline

15 March

acceptance notification

17 April

conference

3 May

camera-ready version submission deadline

17 May

post-review results notification

Areas of Interests

We welcome submissions on a wide range of topics, including, but not limited to:

Algorithms and data structures	High-performance computing	Programming languages
Big data	Information retrieval	Recommendation systems
Cloud systems	Information security	Robotics
Coding theory	Intelligent data analysis	Semantic web
Compilers	Internet of Things	Social networks
Crowdsourcing	Machine learning	Software analysis
Data storage and processing	Mobile systems	Software testing
Development management	Modelling	Software verification
Digital signal processing	Natural language processing	Software virtualization
Distributed systems	Networks and telecommunications	Software-defined networks
E-commerce / e-government	(Non-)relational databases	Theoretical computer science
Empirical software engineering	Operating systems	Visual languages

Submissions

Papers must be submitted electronically, via the SEIM-2020 [EasyChair website](#).

All submissions must come in PDF format, conform to the [IEEE Conference template](#), and not exceed 7 pages (including figures, appendices and references). We also welcome survey papers with an increased page limit of up to 12 pages. Both Russian and English papers are accepted; the papers should present original work of the authors, not submitted in parallel to other conferences or journals. Russian papers must also include the English title, author information and abstract on the very last page (after the references), to facilitate its processing by the scientific indices. Papers having content published elsewhere will not be accepted.

Depending on the number and quality of submissions, the Program Committee may present the best papers with the Distinguished Paper award. These papers will be considered for publication in one of the peer-reviewed Russian journals, after passing an additional round of reviews.

Reviewing

SEIM-2021 will implement a single-blind review process. To be eligible for publication in the conference proceedings, the authors must present their work in the conference and account for the reviewer's comments and questions in the camera-ready version of the paper to the best of their abilities.

Proceedings

Conference proceedings will be published after the conference. Selected papers will be submitted for indexation to the Russian Science Citation Index and CEUR-WS.org. The selection process will be guided by the results of the post-conference review of the camera-ready versions of the accepted papers.
